Exercise(Spring Contianer)

Q1 .
Hey from message 1

no priority because it's one method.

Q2 .
Hey from message 1 **
1

Method getMessage1 will be executed first because the method getMessage2 will need the value in the return

Q3
Hey from message 1 **
Hey from message 3 **
3

Spring boot is the one that determines who will execute the first Method getMessage1 or Method getMessage3, return value in method getMessage3 is appear in the execute of method getMessage2

Q4
Hey from message 1 **
Hey from main controller
Hey from message 3
3

Because there is a Qualifier in the Constructor it will be execute in method getMessage1 first and it will be transferred to the Constructor and its contents will be printed Execute method getMessage3 because to priority return value in method getMessage3 is appear in the execute of method getMessage2

Q5
Hey from message 3
3
Hey from main controller
Hey from message 2
